Insured Damage means any sudden unforeseen physical loss or damage, which may include but is not limited to the actual breaking, seizing, deformation, burning out or explosion of any part of the Plant, sufficient to prevent the Plant undertaking its normal operation and necessitating repair or replacement before normal operation can be resumed, and which occurs during the Period of Insurance.

Plant means the apparatus/equipment/machinery whether or not functioning independently or as any component part of a collection of apparatus/equipment/machinery which generates, contains, controls, transmits, receives, transforms or utilises any form or source of energy or power, as described in the Plant Schedule.

Plant does not include computers, telecommunication transmitting and receiving equipment, electronic data processing equipment, lighting facilities, audio visual amplification, surveillance equipment, research, diagnostic and electro medical equipment, lifts, escalators, office machines, coin/card operated machines, storage tanks and vats, stationary and mobile pressure vessels containing explosive gases, domestic type hot water systems/service, mobile plant, ducting, reticulating electrical wiring, water and gas piping, and any other Plant and equipment not owned by You or not installed or used at the situation. Unless specified in the Plant Schedule.

Computers and Peripheral Equipment means electronic data processing equipment comprising a central processing unit with flexible programming ability, video display units, printers, hard disks, floppy disk drives, micro diskette drives including read/write heads, electro/mechanical motors and passive components specified in the Plant Schedule, but does not include software.

Boilers and Pressure Plant means those parts of the permanent structure of the Plant specified in the Plant Schedule which are subject to internal steam gas or fluid pressure (other than atmospheric pressure) including fittings and direct attachments which are connected to the permanent structure without intervening valve or cock. This definition also includes the supporting structures of the Plant (other than foundations, masonry and brickwork), such as furnace doors, access doors, external combustion chambers, smoke boxes and casings. This definition also includes the metal parts of pressure and water gauges and their connections to the permanent structure even if separated from the structure by valves or cocks and in the case of an air receiver shall include the pressure parts of the compressor or compressors supplying the air thereto, (but shall not in any event include rotating, reciprocating or electrical apparatus or any interconnecting pressure pipe systems).

Domestic Type Hot Water Systems/Service means heating or hot water systems of a kind used for domestic purpose not exceeding 500 litres and normally operating at a temperature not exceeding 99 Degrees Celsius.

Explosion means the sudden unforeseen and violent:

- (i) rending of any Boiler or Pressure Plant or Pressure Pipe Systems caused by the force of internal fluid pressure or pressure of ignited flue gases, but excluding any rending caused by the force of any other chemical action or reaction.
- (ii) bursting or disruption of turbines, compressors, engine cylinders, hydraulic cylinders, flywheels or other parts subject to centrifugal force, transformers, switches or oil immersed switch gear.

Collapse means the sudden distortion of the furnace or firebox of an internally fired Boiler or any part of a pressure vessel caused by bending or crushing of the permanent structure by force of steam, gas, fluid pressure or vacuum including damage caused by overheating resulting from a deficiency of water.

Pressure Pipe Systems means:

- (a) in respect of Boilers and Unfired Pressure Vessel Plant any pressure pipe systems with valves, fittings, traps and separators which contain steam condensate, gas or fluids under pressure (other than atmospheric pressure) and which is generated in whole or in part within the Plant specified in the Schedule, including any feed water piping between such Boiler and its feed pump or injector, but not including any such pipe systems which form part of any other vessel or apparatus;
- (b) in respect of refrigeration and air-conditioning Plant specified in the Plant Schedule the interconnecting coils and pipework containing transfer media.

Period of Insurance is the period referred to in the Schedules.

Schedule means the Schedule/s attached to this policy or any later Schedule issued on renewal or variation or by way or endorsement.

Basis of Claims Settlement

We will insure You against:

- (a) Insured Damage to the Plant whilst at the Situation,
- (b) Physical loss or damage to other property belonging to You or in Your custody or control and for loss or damage for which You are legally liable which results solely from impact from flying fragments of the Plant caused by Insured Damage to the Plant,

in accordance with the Basis of Settlement clauses set out below.

We will, at Our option, repair, rebuild or replace any item which has been damaged or pay for the cost of same up to the Limit of Liability.

We will not pay for the cost of any alterations, improvements or overhauls which are not part of the repair, rebuilding or replacement of the item.

We will not pay for any loss or damage to any item which is liable to be repaired or replaced under any maintenance agreement, or under any warranty issued by a manufacturer, supplier or maintenance organisation.

If the repairs are carried out by You either at the Situation or at a workshop owned by You We will pay the actual cost of materials and wages incurred for the purpose of carrying out the repairs plus reasonable overhead markup, provided the person carrying out the repairs is qualified to do so.

If it is necessary to replace parts which are unavailable or obsolete We will not pay more than the estimated cost of similar parts for similar type of plant currently available. If similar parts are found to be unprocurable We shall not pay more than the manufacturer's or supplier's latest price list.

The work of repairing, rebuilding or replacing must be commenced and carried out with reasonable despatch, failing which We shall not be liable to make any payment greater than the cost necessary to repair, rebuild or replace the item at the time that the Insured Damage occurred.

Where damage is confined to part of a machine or structure, We shall not pay more than the cost of repairing or replacing that part together with the cost of any necessary dismantling and erection. However, We shall not pay more than We could have been called upon to pay if the machine or structure had been totally destroyed.

Provided that Our total liability in respect of any one occurrence shall not exceed:

- (i) when the Plant is specified in the Plant Schedule as a separate item – the amount specified in the Plant Schedule against that item as the Limit of Liability less the Deductible;
- (ii) when the Plant is insured with other Plant collectively as a group – the amount specified in the Plant Schedule against the group as the Limit of Liability less the Deductible;
- (iii) when the item is other property referred to in paragraph (b) above, more than the amount specified in (i) or (ii) above (as the case may be) inclusive of the amount payable for the repair or replacement of the Plant.

Our liability inclusive of this additional benefit shall not exceed the Limit of Liability specified in the Plant Schedule.

Provided also that Our approval for these additional costs has first been obtained.

Automatic Temporary Cover for Additional Plant

We will indemnify You for Insured Damage occurring to additional Plant which is installed or brought into use at the Situation after the commencement of the Period of Insurance for a period of 90 days after its installation or bringing into use (whichever is the earlier) provided that:
