

Throughout August 2006 broker forums were held in NSW, Victoria and Western Australia by the Vero Construction and Engineering Team.

The forums provided brokers with an opportunity to:

- Learn about new Warranty and Contract Works initiatives and participate in a an open discussion
- Expand their cross-selling skills to facilitate portfolio growth through a NIBA and ANZIFF accredited keynote session; and
- Participate in an evening of **trivia madness**

A great time was had by all and even misguided trivia participants received a prize!

We would like to thank all attendees for their participation at these events and the honest feedback they provided. Steps have been taken to further refine and improve our products and service provided based on your feedback.
